GANESH BHAD

Software Developer | Immediate Joiner

Contact:- 9130677978 | LinkedIn-Ganesh_Bhad | Email:- ganeshbhad1515@gmail.com | GitHub-Ganesh_Bhad

PROFILE

Java Backend Developer (Fresher) with strong hands-on experience in building secure and scalable RESTful APIs using Spring Boot and Spring Security. Proficient in JWT-based authentication, role-based authorization, and database integration using Spring Data JPA, Hibernate, and MySQL. Experienced in API testing using Postman and documentation with Swagger. Good understanding of layered architecture, exception handling, and microservices fundamentals.

SKILLS

Programming: Java, HTML, CSS
Backend: Spring, Spring Boot, Spring Security, JDBC, Hibernate, JPA, Maven
API & Security: REST APIs, JWT Authentication, Role-Based Access Control, Swagger
Database: MySQL
Tools: Git, GitHub, Eclipse, VS Code, Postman, MySQL Workbench
Soft Skills: Analytical Thinking, Teamwork, Problem Solving
Concepts: Layered Architecture, Exception Handling, Microservices Basics, SDLC

CERTIFICATION

Android App Development — Mountreach Solution Pvt. Ltd — **(2022)**
Completed industrial training in Android development and created multiple apps, including a Gym Management System And Music Player.

EDUCATION

BE – Computer Engineering (2022–2025) Mumbai University — **CGPA: 7.86**
Diploma – Computer Engineering (2019–2022) Govt. Polytechnic Jalna (MSBTE) — **76.40%**
SSC– Maharashtra Board (2018–2019) — **81.40%**

PROJECTS

User Management – Spring Boot
- Developed secure RESTful APIs using Spring Boot 2.7.14 following layered architecture.
- Implemented JWT-based authentication and role-based authorization (ROLE_USER, ROLE_ADMIN).
- Developed 12+ REST APIs with JWT authentication handling 100+ test requests successfully.
- Integrated MySQL database using Spring Data JPA and Hibernate.
- Implemented global exception handling and tested APIs using Postman and Swagger.

Gym Management System – Android + MySQL
- Developed during industrial training.
- Implemented member registration, fee management, attendance tracking, and reporting features.
- Designed MySQL database schema and improved Android UI and backend integration.
